PROFESSIONAL SUMMARY

Passionate and results-driven Full Stack Engineer with hands-on experience building immersive, scalable, and highly responsive web applications. Proficient in modern frontend architectures (React, JavaScript ES6+, HTML5, CSS3) and robust backend development (Node.js, Express, Socket.io), alongside database management. Strongly focused on clean code, modular software design patterns, and efficient algorithm design.

WORK EXPERIENCE

Full Stack Developer Intern — Emertxe Pvt. Ltd.

Aug 2025 – Dec 2025

- Designed and developed responsive full-stack applications using React, Node.js, and ES6+ JavaScript, improving client-side responsiveness by 25%.
- Engineered structured REST APIs and optimized database schemas, ensuring seamless client-server communication and reducing API latency.
- Collaborated on building reusable UI components and styled pixel-perfect interfaces with CSS Flexbox/Grid and Tailwind.

Software Development Engineer (SDE) Intern — Bluestock

Apr 2025 – Jun 2025

Fintech

- Implemented secure backend services and integrated third-party RESTful API endpoints for Fintech application modules.
- Resolved critical database and software bottlenecks, refactoring core code structures to improve runtime efficiency.
- Leveraged advanced Data Structures and Algorithms (DSA) to optimize search/filter query logic and maintain a robust codebase.

KEY PROJECTS

HomelyHub Web

- Developed a modern real estate search and property finder portal with custom catalogs, layout sorting, and dynamic filters.
- Built modular components using React and styled them with localized CSS modules to prevent style leakage.

React

CSS Modules

Node.js

Vercel

Chat App Socket.io

- Built a real-time group chat platform enabling multi-room chat sessions, connection alerts, and WebSocket notifications.
- Optimized message-relaying loops and engineered low-latency event listeners for seamless communication.

SKILLS

LANGUAGES

JavaScript (ES6+)

Python

Java

C++

C

HTML5 / CSS3

FRAMEWORKS & LIBS

React

Node.js

Express.js

Three.js (3D WebGL)

Socket.io

Tailwind CSS

GSAP

DATABASES & CLOUD

MongoDB

MySQL

Firebase

Vercel

TOOLS & PLATFORMS

Git

GitHub

Postman

VS Code

Figma

npm

EDUCATION

B.Tech in Information Technology

Univ. College of Eng. & Tech (UCET)

Hazaribagh | 2023 - 2026 (Lateral Entry)

Graduation: Sep 2026 (Expected)

Diploma in Computer Engineering

Govt. Polytechnic, Kharsawan

2020 - 2023 | Distinction Graduate

CODING PROFILES

LeetCode Profile

GeeksforGeeks Profile

HackerRank Profile

Node.js

Socket.io

Express.js

JavaScript

AI Image Generator

- Created an interactive text-to-image application integrating neural network APIs to translate prompts into custom graphics.
- Designed responsive grid layouts utilizing CSS Grid and Flexbox for custom download and share controls.

JavaScript ES6

API Integration

CSS Grid

UI Design
